

D MAXX

MILES AHEAD

A TRIBUTE TO THE PAST. AND A GLIMPSE OF OUR FUTURE.

The International® D-Series. It is the truck that drove a nation's post-war expansion. From agriculture to construction, the D-Series built our country at a record pace. Today, we salute it with the DMAXX, a truck every bit as fast.

Sporting a mild chop and shaved trim, the DMAXX is unmistakably an International D-Series. Under the hood, the four valve per cylinder, 390 cubic inch MaxxForce™ 7 diesel V-8 incorporates technology that was nothing more than a dream in 1939 when this truck first rolled off the assembly line. An EVRT® turbocharger with charge-air cooler. A high-pressure common rail fuel system. Electronically actuated piezo injectors. The result is 350 horsepower and a tire-shredding 650 lb-ft of torque.

A boxed and reinforced frame stands up to that massive torque while a height-adjustable air suspension is ready to roll low and slow. Riding on 18-inch rims and beautifully finished in high-gloss red and black, the DMAXX captures the spirit of the original. It is this spirit that can also be found in our mold-shattering advanced classic for the 21st century – the International® LoneStar.®
